

W

hen you choose a container for your material handling needs, your objective is to get products from point A to point B quickly, easily, efficiently and at a reasonable cost. ROPAK™ reusable containers fit the bill. They have some of the best return ratios in the industry, often as high as 3:1, to save on storage and shipping fees. ROPAKs are engineered for long life under severe and repeated use. They are designed to reduce packaging and shipping costs, as well as provide superior product protection.

These photos (1-4) show how easy it is to collapse a ROPAK container. All models are designed with speed and efficiency in mind.

How ROPAKs Work
